Profile

To obtain a position in a company where I can apply all my knowledge and experience in the field of work, but always seeking to improve and learn from the activities I carry out, while achieving greater responsibility and new challenges.

Study

Universidad del Noreste — **Tampico, México**
Computer Systems and Electronics Engineer — 2018 – 2020

- I represented the University of the Northeast at the State Contest of *Creativity and Innovation in Technology, ExpoCiencias Tamaulipas.*

Science and Advance Studies Institute of Tamaulipas — **Tampico, México**
Highschool — 2018

Professional experience

Web and mobile *front-end* developer — **Guadalajara, México**
IO Connect Services — 10/2021 – 04/2023

- I managed and developed updates in the web environment of the official website for a client from the USA, using **Angular**, **PHP**, and **HTTP** form requests.
- I developed customized solutions for a banking StartUp company using React Native and Git.

Web developer — **Guadalajara, México**
Resser — 08/2023 – 08/2024

- As a full-stack developer I developed solutions for the internal use of the company, making use of technologies such as **React**, **C#** and **SQL**, among others. I proposed and implemented the Smart Components standard, giving the structure that will be required for the dimensions of the project.

Web developer — **Guadalajara, México**
SOLEMTI — 04/2025 – 12/2025

- I developed custom solutions on the client's website using the **React** framework. I implemented file structures such as **mono-repos**.
