

Profile

I have **5 years** of experience developing websites with **React** and mobile apps with **React Native**, which are accessed from different parts of the world.

I'm looking for my next challenge, which will be on a Canadian scale, developing applications using the best practices that every project deserves, such as **clean code, CI/CD, and SOLID**.

Professional Experience

Web developer Guadalajara, México
SOLEMTI 04/2025 – 12/2025

- I updated the payment form for a department store with more than 11 million cardholders nationwide, using **React** and **Stripe**.

Web developer (Full-Stack) Guadalajara, México
Resser 08/2023 – 08/2024

- I led the design and development of the **Stolen Vehicle Recovery (SVR)** module for 20 users who were working with law enforcement to recover stolen vehicles by polling their GPS locations every 5 seconds.
- I was part of the team that rewrote the new version of the internal tool using **React** for 180 users.
- I proposed organizing by logic, view, and style using the Barrel Export system to reduce conflicts when merging versions with **Git**.

Mobile developer Guadalajara, México
IOTAC 04/2023 – 07/2023

- I led the **greenfield development** of the company's main service app, which displays on-demand information about the gas level in the user's tank.
- I mentored another team member on the development and organization of the project using **React Native**.

Web and mobile developer Guadalajara, México
IO Connect Services 10/2021 – 06/2023

- I developed the **Home Screen** for the **YoCripto app**, which displayed the balance, cards, and recent transactions.
- I implemented the account registration workflow for new users by integrating handwritten digital signatures, facial recognition, and scanning of official identification (INE/driver's license).

Intern Queretaro, México
Deloitte 03/2021 – 10/2021

- Technical training on **Salesforce development**.

Intern Tampico, México
Geoteco 03/2019 – 12/2019

- Maintenance of the institutional website using **PHP**, adding basic functionality under the supervision of the team.

Personal projects

oscargarza.com

I developed my website with the following three points as my top priorities:

1. Quick deployment of updates.
2. Low development and maintenance costs.
3. Accessibility for audiences who speak different languages.

With this in mind, I designed the infrastructure using **React** for development, **GitHub** Pages for hosting, the **gh-pages CLI** for deployment, and Cloudflare for the custom domain's DNS. In addition, I integrated the **i18next** library to enable translation into **English, Spanish, and French**.

Languages

- Spanish (native)
- English (advanced)
- French (basic)

Technologies / Methodologies

- Agile
- Git
- Figma
- Jira
- CI/CD
- UX/UI design
- n8n
- MCP Servers
- React
- React Native
- HTML / CSS / JavaScript
- Typescript
- MySQL
- SQL Server
- PostgreSQL

Certificates

TOEFL 520 pts.

Microsoft Office Specialist

n8n + MCP: Automatización y agentes AI

Education

Universidad del Noreste Tampico, México
Computer and Electronic Systems Engineering 2020
- I represented the Universidad del Noreste at the *Tamaulipas ExpoCiencias State Competition for Creativity and Innovation in Technology*

Instituto de Ciencias y Estudios Superiores de Tamaulipas Tampico, México
High School Education 2018
