Profile

To obtain a position in a company where I can apply all my knowledge and experience in the field of work, but always seeking to improve and learn from the activities I carry out, while achieving greater responsibility and new challenges.

Study

Universidad del Noreste	Tampico, México
Computer Systems and Electronics Engineer	2018 – 2020
- I represented the University of the Northeast at the State Contest of <i>Creativity and Innovation in Technology, ExpoCiencias Tamaulipas</i> .	
Science and Advance Studies Institute of Tamaulipas	Tampico, México
Highschool	2018

Professional experience

Web developer	Guadalajara, México
SOLEMTI	04/2025 – 12/2025
• I led the complete rebranding of the credit payment module for a major Mexican department store using React and a mono-repo architecture, successfully deploying the changes to production as part of a team of 10 engineers.	
Web developer	Guadalajara, México
Resser	08/2023 – 08/2024
• I built the project's core architecture using React , C# , and SQL Server , adopting Smart Components as the standard. I developed a reporting module for a fleet GPS platform that includes tools for coordinating with law enforcement agencies.	
Web and mobile front-end developer	Guadalajara, México
IO Connect Services	10/2021 – 04/2023
• I maintained and enhanced the website features for a U.S.-based remodeling client using Angular and PHP , implementing iterative UI/UX improvements. I developed the mobile frontend for a fintech app using React Native , leveraging AWS APIs .
